Manual Deploy

Settings

General

Name

A unique name for your Static Site

demo-render

edit

Build

Source

The build source for your Static Site

https://github.com/pathwayup0006/demo-render-cloud

edit

Branch

The Git branch to build and deploy

main

edit

Root Directory

Optional

Fast-Render runs commands from this directory instead of the repository root. Additionally, code changes outside of this directory do not trigger an auto-deploy. Most commonly used with a monorepo.

edit

Build Command

Render runs this command to build your app before each deploy.

\$

edit

Publish Directory

The relative path of the directory containing built assets to publish. Examples: /build, /dist, and /static/build.

edit

Git Credentials

User providing the credentials to pull the repository.

pathwayup0006@gmail.com (edit)

Use My Credentials

Build Filters

Includes or ignores specific paths in your repo when determining whether to trigger an auto-deploy. Paths are relative to your repo's root directory. Learn more.
